XPX444FD

60V N-Channel Enhancement Mode MOSFET

■ DESCRIPTION

TheXPX444FD is N channel enhancement mode power effect transitor which is produced using high cell density advanced trench technology.

The high density process is especially able to minize on-state resistance.These devices are. especially suited for low voltage application power management DC-DC converters.

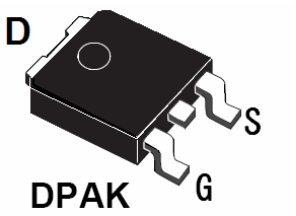
■ FEATURE

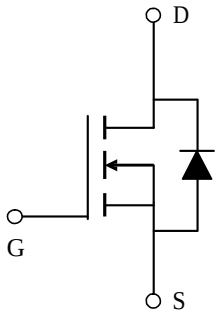
- ◆ *60V/28A, $R_{DS(ON)}$=22mΩ(typ.)@VGS= 10V*
- ◆ *60V/18A, $R_{DS(ON)}$=28mΩ(typ.)@VGS= 4.5V*
- ◆ Super high design for extremely low $R_{DS(ON)}$

■ APPLICATIONS

- ◆ Power Management
- ◆ DC/DC Converter
- ◆ Load Switch

■ PIN CONFIGURATION





■ ORDERING INFORMATION

Part Number	Package Code	Package	Shipping
XPX444FD AT-TRG	T	TO-252	2500EA / T&R

※ Year Code : 0~9
※ Week Code : A~Z(1-26); a~z(27~52)
※ G : Green Product. This product is RoHS compliant.

■ ABSOLUTE MAXIMUM RATINGS (T_A = 25℃ Unless otherwise noted)

Symbol	Parameter	Max.	Units
V_{DS}	Drain-to-Source Voltage	60	V
V_{GS}	Gate-to-Source Voltage	± 20

This integrated circuit can be damaged by ESD UniverChip Corporation recommends that all integrated circuits be handled with appropriate precautions. Failure to observe proper handling and installation procedure can cause damage. ESD damage can range from subtle performance degradation to complete device failure. Precision integrated circuits may be more susceptible to damage because very small parametric changes could cause the device not to meet its published specifications.

Attention:

- Any and all XPX power products described or contained herein do not have specifications that can handle applications that require extremely high levels of reliability, such as life-support systems, aircraft's control systems, or other applications whose failure can be reasonably expected to result in serious physical and/or material damage. Consult with your XPX power representative nearest you before using any XPX power products described or contained herein in such applications.

- XPX power assumes no responsibility for equipment failures that result from using products at values that exceed, even momentarily, rated values (such as maximum ratings, operating condition ranges, or other parameters) listed in products specifications of any and all XPX power products described or contained herein.

- Specifications of any and all XPX power products described or contained herein stipulate the performance, characteristics, and functions of the described products in the independent state, and are not guarantees of the performance, characteristics, and functions of the described products as mounted in the customer's products or equipment. To verify symptoms and states that cannot be evaluated in an independent device, the customer should always evaluate and test devices mounted in the customer's products or equipment.

- XPX power Semiconductor CO.,LTD. strives to supply high-quality high-reliability products. However, any and all semiconductor products fail with some probability. It is possible that these probabilistic failures could give rise to accidents or events that could endanger human lives, that could give rise to smoke or fire, or that could cause damage to other property. When designing equipment, adopt safety measures so that these kinds of accidents or events cannot occur. Such measures include but are not limited to protective circuits and error prevention circuits for safe design, redundant design, and structural design.

- In the event that any or all XPX power products(including technical data, services) described or contained herein are controlled under any of applicable local export control laws and regulations, such products must not be exported without obtaining the export license from the authorities concerned in accordance with the above law.
